Research Interests

Inverse Problems in Medical Imaging

- CT Metal Artifact Reduction, Under-sampling CT, Spectral CT, MRI Super-Resolution, etc.

Unsupervised Learning for Medical Imaging

- Neural Representation, Deep Image Prior, Unrolling Networks, etc.

Education

ShanghaiTech University

2020.09 - 2025.07 (Expected)

- Ph.D. student in Electronic Science and Technology
- Major GPA: 3.78/4.00
- Advisor: Prof. Yuyao Zhang

China University of Geosciences, Wuhan

2016.09 - 2020.07

- B.Eng. in Communication Engineering

Research Projects

CT Metal Artifact Reduction [1]

2022.12 - Now

- Proposed an unsupervised DL model to reduce CT metal artifacts.
- Formulated the metal artifact reduction problem as solving energy-independent densities.
- Defined a physical model to simulate the acquisition from densities to measurements.
- Our model outperforms supervised counterparts on in-domain and out-of-domain data.

Sparse-view and Motion Rigid CT [2],[3]

2021.12 - 2022.11

- Proposed an unsupervised DL model to handle sparse-view and rigid-motion CT jointly.
- Leveraged implicit prior by neural representation to constraint the solution space of desired images.
- Formulated the rigid motion of subjects as learnable variables (rotation and translation).
- Our solution greatly outperforms the best traditional and unsupervised reconstruction algorithms.

MRI Super-Resolution [4],[5],[6]

2020.09 - 2021.11

- Proposed an arbitrary-scale super-resolution (ArSSR) approach for high-resolution MRI.
- Leveraged neural implicit space to model the ArSSR task as a sampling operator of different scales.
- Our model achieves excellent performance on simulation and clinical data.

Selected Publications

Teaching Experience

CS270B: Advanced Digital Image Processing

Spring 2023

ShanghaiTech University, Teaching Assistant

- Delivered tutorials and quizzes
- Designed assignments and projections
- Graded final scores.

Academic Service

- **Reviewer for Conferences:** MICCAI 2023, IEEE ISBI 2024
- **Reviewer for Journals:** IEEE J-BHI, Journal of Computational Design and Engineering
- **Volunteer:** ASSIST 2023

Academic Service

- **Programming Language:** Python, Matlab, C
- **Software & Framework:** Pycharm, VS Code, GitHub, L^AT_EX, ITK-SNAP, Pytorch
- **Language:** Mandarin (Native Speaker), English (CET-6, ONLY enough for research)
